

**Errata for PhD thesis:
“Encoding of Financial Signals in the Human Brain”
by Antoine Jean Bruguiier**

<http://www.bruguiier.com/thesis.html>
<http://etd.caltech.edu>

Erratum 1:

In the mathematical quiz of table 4.1 page 46, the correct answer to the second problem is “more” not “less”. The probability is $p=0.75$. The subsequent analysis was consequently incorrect, resulting in an incorrect figure 4.11 page 54. The new figure is:

Thus, the correlation goes to 0.06 from 0.19 and the p-value to 0.70 from 0.22. Our assertion that the mathematical abilities are poor predictors of financial market savvy is therefore strengthened.

Sorry about this mistake.
